Industrial Operator Laser Safety Course - Level 3

The operator laser safety awareness course provides a non-mathematical introduction to lasers and laser hazards for those using lasers an industrial workplace. It introduces laser safety practice, hazard control and regulation of the use of lasers in an industrial setting.

Completed; indicates the participant attempted the course and achieved the pass mark of 85% in the online test.

Attended; certificates are not issued in line with the requirement for competency in AS/NZS IEC 60825.14.

Laser Safety Course (LSC) Level to Defence Laser Safety Policy mapping:

This course is tailored for industrial applications and does not directly map to an ADF qualification.
